Education

Vellore Institute of Technology, Bhopal **2023 – 2027 (Expected)**
B.Tech. in Computer Science and Engineering *CGPA: 8.6 / 10*

City Montessori School, Lucknow **2022**
Class 12 (ISC) *Percentage: 94.25%*

City Montessori School, Lucknow **2020**
Class 10 (ICSE) *Percentage: 95.6%*

EXPERIENCE

Infosys Springboard | *Full-Stack Intern* Jan 2026 – Present

– Building scalable **Full-Stack applications** and mastering **enterprise software standards**.

Bluestock Fintech | *SDE Intern* Dec 2025 – Jan 2026

– Engineered **IPO Web Apps** and **REST APIs** with optimized **MySQL** backends.

SKILLS

Languages: Java, JavaScript (ES6+), SQL,Python (NumPy, Pandas)
Frontend/State: React.js, Tailwind CSS, HTML5/CSS3, Vite
Backend/Testing: Node.js, Express, MongoDB, Postman API Automation
AI/ML: Supervised Learning, Scikit-Learn, Basic Neural Networks, OpenCV **Tools/Cloud:** Git/GitHub, **CI/CD Basics**, AWS

Projects

MasonGrid: Full-Stack Visual Content Systems **Oct 2025**

- **Architected** a scalable image discovery platform using the **MERN stack**, implementing a dynamic **Masonry grid algorithm** to optimize frontend rendering efficiency and user experience.
- **Engineered** a robust **RESTful API** with Node.js/Express, incorporating custom middleware for secure **JWT Authentication** and handling concurrent state updates for board management.
- **Optimized MongoDB schemas** to ensure data integrity and low-latency content retrieval, reducing query response times for high-density visual data.
- **Applied Modular Design** principles to the frontend (React/Vite), ensuring high code reusability and system maintainability for future feature scaling.
- **Tools & Stack:** Node.js, Express, MongoDB, React, Vite, RESTful Services, Git/GitHub.

Pennies: Financial Data Management System **Oct 2025**

- **Developed** a high-performance financial tracking application using **React and Vite**, implementing advanced **State Management** to handle real-time data synchronization across components.
- **Architected** a modular, reusable **Component Library** focusing on UI/UX scalability and responsive design principles, ensuring seamless interaction across multiple device form factors.
- **Optimized** client-side performance by leveraging **Vite's Hot Module Replacement (HMR)** and efficient DOM reconciliation strategies, significantly reducing asset load times and rendering latency.
- **Implemented** robust data validation logic to ensure the accuracy and integrity of user-inputted financial records.
- **Tools & Stack:** React, Vite, JavaScript (ES6+), CSS3 (Grid/Flexbox), State Hooks, Git.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Data Science Professional Oct 2025

– Certified in **Generative AI Integration**, **AI Quick Actions**, and **Data Preparation**.

Leadership & Extracurricular

Content Team Lead - Bit by Bit Club, VITB **June 2024 – Present**

- Spearheaded content creation for **15+ technical events** and hackathons, ensuring technical accuracy and clarity.
- Mentored 10 junior content members, establishing structured workflows that drove a **20% increase in content output efficiency**.

Events Team Core Member - E-Cell, VITB **November 2024 – Present**

- Executed planning and logistics for **4 major entrepreneurship summits**, hosting over 500 attendees collectively and managed cross-functional coordination (design, marketing, logistics) to ensure successful event execution.
