EDUCATION

Vellore Institute of Technology, Bhopal	2023 – 2027 (Expected)
B.Tech. in Computer Science and Engineering	CGPA: 8.61 / 10
City Montessori School, Lucknow	2022
Class 12 (ISC)	Percentage: 94.25%
City Montessori School, Lucknow	2020
Class 10 (ICSE)	Percentage: 95.6%

SKILLS

Languages: Java, JavaScript (ES6+), SQL, Python
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Full-Stack: React.js, Node.js, Express.js, REST APIs, MongoDB, MongoDB Aggregation Pipelines, PostgreSQL, HTML5, CSS3
AI/ML: Scikit-learn, Pandas, NumPy, Matplotlib, LLM API Integration (Gemini), Prompt Engineering
Tools & Infra: Git, GitHub, AWS (basics), Vercel Deployment

PROJECTS

FirstCrore: AI-Powered Financial Wellness Platform	Feb 2026
- Built and deployed a full MERN-stack platform end-to-end on Vercel, including a rule-based Financial Health Score engine and an FD ladder optimizer for first-time earners navigating personal finance independently. - Designed and shipped an LLM-powered financial jargon explainer using the Gemini API — engineered prompts and handled structured API responses to render real-time contextual explanations as a production feature. - Engineered a Python data pipeline (pandas, matplotlib) for transaction processing and trend-based risk reporting, generating category-wise spending breakdowns rendered through Chart.js dashboards.	
Cardiovascular Risk Predictor: Clinical Decision Support System	Nov 2025
- Built an automated risk-flagging system for CHD screening on the Framingham Heart Study Dataset, running comparative model validation across Logistic Regression and Random Forest. - Diagnosed why Random Forest overfit on SMOTE-balanced synthetic data while Logistic Regression generalized better — a deliberate, defensible model-selection call. - Prioritized recall over precision given real-world risk appetite, tuning the model to automatically flag high-risk patients for follow-up; ran feature importance analysis identifying Age, Systolic BP, and smoking as primary drivers.	

EXPERIENCE

Infosys Springboard Full-Stack Developer Intern	Jan – March 2026
- Owned a full-stack task management application end-to-end — backend, frontend, and deployment — using REST APIs, modular architecture, and component-based design under enterprise engineering standards. - Worked in an AI-assisted development workflow (Copilot/Claude pair programming), validating and refactoring AI-generated code against architecture and code-quality requirements; practiced Git branching and code reviews.	

ACHIEVEMENTS

Top 100 of 2600+ teams — ZS Campus Beats National Hackathon; earned Pre-Placement Interview (PPI) from ZS Associates for outstanding performance. Top 18 teams — Global Digital Health Hackathon; invited to present at Jio World Convention Centre, Mumbai among finalists nationwide.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Data Science Professional	Oct 2025
--	----------

LEADERSHIP & EXTRACURRICULAR

Content Team Lead - Bit by Bit Club, VITB	June 2024 – Present
- Led content strategy for 15+ technical events, managing end-to-end content production from ideation to publication. - Mentored 10 junior members on technical writing and communication, improving overall team output quality.	
Events Team Core Member - E-Cell, VITB	November 2024 – Present
- Managed logistics for 4 entrepreneurship summits hosting 500+ attendees across VITB campus. - Coordinated design, marketing, and operations teams ensuring seamless event execution.
